## PUMP IT UP PRO XERDANCE V2 SOFTWARE

**Music:** 222 original and licensed popular songs

**Play Levels:** Three simultaneously active levels of difficulty (4 total – easy, normal, hard, crazy). Players choose their level and can change mid-song.

### Online Tracking and Assessment for Individuals and Facilities:

- Players swipe personal ID cards on dance pad before they start to play
- The game automatically uploads player stats to web site via network connection or bundled cellphone adapter
- Players view their stats (graphs, high scores for each song/difficulty, total counts) and class stats (high scores, averages), or global high score leaderboards (everyone, by game owner, by site) on the web site using the unique number on their ID card as a password
- Players can set personal goals using the web site
- Instructors can view individual and class aggregate stats on the web site

### Online Instructor Course Creation:

- Instructors can create and edit courses on the web site (without the use of the game computer) and they'll automatically appear on the computer via the network connection
- Instructor creates a program of songs/difficulties that will play non-stop
- Courses can be saved and can be recalled later

**Prize Program Option:** The web site can generate prize reports saying which players earned which prizes based on the player stats
